

**REMARKS**

Examiner Kang is thanked for taking the time to discuss the status of the present application in a telephone conversation held with the Applicant's representatives on May 16, 2005. Per Examiner Kang's request and further to the *Resubmission of Claims* filed April 21, 2005 (received by OIPE April 25, 2005), the Applicant submits herewith a *Supplemental Resubmission of Claims*, which corrects a minor typographical error in claim 7. Specifically, in claim 7, line 5, "and n-channel thin film transistor" has been corrected to "an n-channel thin film transistor" to be consistent with prior amendments to the claim.

Reissue claims 1-59 are believed to be in condition for allowance.

Should the Examiner believe that anything further would be desirable to place this application in better condition for allowance, the Examiner is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,
